# Knox County Health Department: COMMUNICABLE DISEASE REPORT

## MONTHLY SUMMARY

*This monthly report contains case information for February 2019 and compares the numbers to an adjusted average calculated from archived data. The adjusted average accounts for the communicable diseases reported for February 2019 and estimates the number of expected cases for the month based off of data from 2014- 2018. The case classification status is included with each disease report and is subject to change once more information is obtained.*

Communicable disease activity for February included cases of Campylobacteriosis, Chlamydia, Gonorrhea, Hepatitis B (including delta) – chronic, Hepatitis C – chronic, Influenza – associated hospitalization, and Shigellosis. All diseases, except Chlamydia, were above their expected averages for the month. KCHD through its local influenza surveillance program is seeing an increase in cases. None of the reported diseases required activation of the KCHD Epi Response Plan.
