

What to Bring CHECKLIST

PHOTO ID

We want to make sure we are providing the best possible care to our patients. Proving identity is crucial for your safety and care.

INSURANCE CARD

By verifying your insurance information at each visit, we can save you time and frustration due to inaccurate insurance billing.

PROOF OF HOUSEHOLD INCOME

To best determine discount eligibility, proof of household income is needed to update your patient profile. Proof of household income can be in the form of tax returns or pay stubs. These documents need to be in physical form (not an online statement or email.)

LIST OF MEDICATIONS

A list of current medications and their dosage is important for our practitioners to consider when treating you.
